

Finally Block

```
class FinallyBlock {
    public static void main(String args[]) {
        try {
            int number = 45 / 5;
            System.out.println(number);
        } catch (NullPointerException e) {
            System.out.println(e);
        } finally {
            System.out.println("The Execution of final block
always happen ");
        }
        System.out.println("The End.");
    }
}
```

Finally Block with Exception

```
public class FinallyBlock {

    public static void main(String args[]) {
        try {
            int number = 2 / 0;
            System.out.println(number);
        } catch (NullPointerException e) {
            System.out.println(e);
        } finally {
            System.out.println("finally block is always
executed");
        }
        System.out.println("The End.");
    }
}
```

Exception Handled

```
public class FinallyBlock {  
    public static void main(String args[]) {  
        try {  
            int number = 12 / 0;  
            System.out.println(number);  
        } catch (ArithmeticException e) {  
            System.out.println(e);  
        } finally {  
            System.out.println("finally block is always  
executed");  
        }  
        System.out.println("The End.");  
    }  
}
```
