Try with Parameter

```java
import java.io.FileOutputStream;

public class TrywithResouces {
    public static void main(String[] args) {
        try(FileOutputStream fileOutputStream =new
FileOutputStream("abc.txt")){
            String msg = "Welcome to java!";
            byte byteArray[] = msg.getBytes();
            fileOutputStream.write(byteArray);
            System.out.println("Message written to file
successfuly!");
            }
            catch(Exception exception){
                System.out.println(exception);
            }
    }
}
```
