Basic Try-Catch Block

```java
class TryCatch {
    public static void main(String args[]) {
        int num1, num2;
        try {
            num1 = 0;
            System.out.println("Sending the Exception");
            num2 = 62 / num1;
            System.out.println(num2);
        }
        catch (ArithmeticException e) {
            System.out.println("We can't divide any number by zero");
        }
        catch (Exception e) {
            System.out.println("Exception occurred");
        }
        System.out.println("Try-Catch ended.");
    }
}
```
